

The Helios Trail

To help you get an idea of just how vast the Sun is and how small and distant the planets of our solar system are in comparison to this celestial giant, we have placed posters at various locations in the area. These posters show their relative distance and relative diameter at the same scale as Helios (1 to 200 million). Why not be a Helios explorer and go and find them?!

Earth on
Weymouth
Avenue
752m away
d. 6.41cm

Mars on
Weymouth
Avenue
1.15km away
d. 3.41cm

Neptune
at Bridport
Arts Centre
